

Title

Student 1 ID : Student 1 Name

Student 2 ID : Student 2 Name

Supervisor:

Department of Computer Science and Engineering

UTTARA UNIVERSITY

HOLDING 77, BERIBADH ROAD, TURAG, UTTARA, DHAKA 1230, BANGLADESH

- Introduction
- <Domain of the research and it's important>

Department of Computer Science and Engineering

UTTARA UNIVERSITY

HOLDING 77, BERIBADH ROAD, TURAG, UTTARA, DHAKA 1230, BANGLADESH

- Background Study
- <Recent works, related works, >

- Problem Statements (examples)
- 2. <high cost>
- 3. <manual system>
- 4. <Low accuracy >
- 5. <not sustainable>
- 6. <not flexible>

- Aims of the research (examples)

To propose an effective model than existing models.

To develop a new model for

To develop a hybrid model for better outcomes in terms of
.....

- Objective (examples)
- 2. <to study the current system and identify research scope>
- 3. <to propose/ design /develop a model >
- 4. <to execute / test / validate the model or system >
- 5. <to compare with existing model/system/works>

Requirements:

Data:

hardware:

Software:

Functional requirements: visualization, statistical analysis, input, output, process, etc.

Nonfunctional requirements: integrating sustainability features, improving quality of service, product, faster, portability, flexibility, accuracy,

Knowledge Requirements: <mention technical knowledge that you need to accomplish the research/project: programming languages>

Scope of the project/research

- data availability (specified)
- functionality (specified)
- technology (specified)
- boundary is finalized.

Timeline

Gantt chart.
